

Harsh Saini

Java / Spring Boot Developer — Backend Developer

+91-9528799256 | harshsaini2462@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#) | [Portfolio](#)

Education

B.Tech in Computer Science Engineering
Sharda University

2022 – 2026
CGPA: 6.9

Summary

Backend developer specializing in Java and Spring Boot, with experience building and securing REST APIs using Spring Security and MySQL. Comfortable working across the backend lifecycle, including database design, API development, and performance optimization. Gained hands-on experience through internship work and personal projects, with a focus on building reliable and scalable systems.

Skills

- **Languages:** Java, SQL
- **Backend:** Spring Boot, Spring Security, REST APIs, Microservices, JPA/Hibernate
- **Databases:** MySQL, Query Optimization, Indexing
- **Testing & Debugging:** API Testing (Postman), Debugging, Log Analysis, Exception Handling
- **Tools:** Git, GitHub, Postman, Docker
- **Concepts:** Authentication & Authorization, API Design, Pagination, Performance Optimization

Professional Experience

Backend Software Development Intern May 2025 – July 2025
Doritech Consultancy and Software Solutions, Noida

- Optimized API performance by refining SQL queries, adding indexing, and reducing redundant database calls.
- Integrated frontend with backend REST APIs and validated API responses using Postman, ensuring correct handling of edge cases and error scenarios.
- Implemented structured logging and global exception handling, improving debugging efficiency and traceability.
- Identified and resolved bugs by analyzing logs, reproducing issues, and validating fixes through testing.
- Refactored backend modules to improve code maintainability, modularity, and readability.

Projects

StartupEcosystem – AI-Powered Startup–Investor Matchmaking Platform [GitHub](#) | [Live Demo](#)
Java, Spring Boot, MySQL

- Built a startup–investor networking platform using Java, Spring Boot, and MySQL.
- Designed relational database schema and ensured data consistency through validation and controlled transactions.
- Implemented role-based authentication and authorization using Spring Security.
- Developed RESTful APIs and tested endpoints using Postman, covering edge cases and error responses.
- Added pagination using Spring Data JPA (Pageable) to efficiently handle large datasets.

Web-Based To-Do Task Manager [GitHub](#)
Java, Spring Boot, MySQL, Spring Security

- Developed a secure task management system using Java, Spring Boot, and MySQL.
- Implemented Spring Security authentication with encrypted password storage.
- Built RESTful APIs with server-side validation and ensured reliability through API testing.
- Designed normalized database schema and validated CRUD operations for data consistency.

Research Publications

Bridging Startups and Investors: A Review of AI Techniques for Intelligent Matchmaking 2025

- Presented at GSIR International Conference.
- Reviewed AI-based matchmaking using BERT, SBERT, and FAISS.
- Analyzed sentiment models and semantic retrieval techniques for investor recommendation.
- Identified challenges and proposed a hybrid AI-driven approach.

Achievements

- [LeetCode](#) – Solved 240+ DSA problems (100+ Medium, 15+ Hard).

Certifications

- Java Certification – DataFlair
- MySQL – HackerRank
- Java Basics – HackerRank
- Computer Networking – SimpliLearn
