Education

Sharda University

Bachelor of Technology in Computer Science; GPA: 7.04/10

Greater Noida, India

Sept 2022 – May 2026

Technical Skills

Programming Languages: Java 8+, SQL

Backend & Frameworks: Spring Boot, Spring Security, REST APIs, JPA/Hibernate

Databases: MySQL, Query Optimization, Indexing

Tools: Git, GitHub, Maven, Docker, Postman

Core CS & Concepts: Object-Oriented Programming (OOP), Collections Framework, Multithreading Basics, Authentication & Authorization

Experience

Doritech Consultancy and Software Solutions

Noida, India

Backend Software Development Intern

May 2025 – Jul 2025

- Optimized **API performance** by refining **SQL queries**, implementing **database indexing**, and reducing redundant database calls.
- Integrated and validated **REST APIs** using **Postman**, ensuring reliable handling of edge cases and error scenarios.
- Improved application observability through **structured logging**, **global exception handling**, and efficient debugging of production issues.

Projects

Hotel Management System | *Java, Spring Boot, Spring Security, React, MySQL, JPA/Hibernate* [GitHub](#) | [Demo](#)

- Developed a full-stack hotel management system using **Java, Spring Boot, React, MySQL** with **Customer, Hotel Admin, and Super Admin** roles.
- Built secure **REST APIs** for hotel, room type, room, booking, and review management with role-based authorization, validation, and global exception handling.
- Designed a normalized relational database and implemented booking workflows including room allocation, check-in/check-out, hotel approval, and review management.

StartUp Ecosystem Tracker | *Java, Spring Boot, MySQL, JSP*

[GitHub](#)

- Built a startup-investor networking platform using **Java, Spring Boot, MySQL**, and **Spring Security** with role-based authentication and authorization.
- Designed relational database schemas, developed **RESTful APIs**, and implemented **pagination** for efficient large-scale data handling.
- Validated API functionality using **Postman**, ensuring reliable request handling, error responses, and data consistency.

Web-Based To-Do Task Manager | *Java, Spring Boot, MySQL, JSP, Spring Security*

[GitHub](#)

- Developed a secure task management application using **Java, Spring Boot, JSP, MySQL**, and **Spring Security**.
- Designed normalized database schemas and built **REST APIs** with validation, exception handling, and secure endpoint access.
- Developed CRUD functionality for task management with efficient database interactions using **JPA/Hibernate**.

Certificates

Java Certification – DataFlair

MySQL – HackerRank

Java Basics – HackerRank

Computer Networking – Simplilearn

Achievements

Solved 270+ Data Structures & Algorithms problems on LeetCode.

Research Paper Presentation - GSIR 2025: Presented paper on AI-based startup-investor matchmaking at GSIR 2025.
