Education

Sharda University

Bachelor of Technology in Computer Science; GPA: 7.04/10

Greater Noida, India

Sept 2022 – May 2026

Experience

Doritech Consultancy and Software Solutions

Backend Software Development Intern

Noida, India

May 2025 – Jul 2025

- Optimized **API performance** by refining **SQL queries**, implementing **database indexing**, and reducing redundant database calls.
- Integrated and validated **REST APIs** using **Postman**, ensuring reliable handling of edge cases and error scenarios.
- Improved application observability through **structured logging**, **global exception handling**, and efficient debugging of production issues.

Projects

Hotel Management System | *Java, Spring Boot, Spring Security, MySQL, JPA/Hibernate*

[GitHub](#) | [Demo](#)

- Built and deployed a full-stack hotel management system using **Java, Spring Boot and MySQL** with **Customer, Hotel Admin, and Super Admin** roles.
- Built secure **REST APIs** with role-based authorization, input validation, and global exception handling, and validated endpoints using Postman.
- Designed a normalized relational database and implemented booking workflows including room allocation, check-in/check-out, hotel approval, and review management.

Quirk – QR Code Generator | *Java, Spring Boot, Thymeleaf, ZXing*

[GitHub](#) | [Demo](#)

- Developed and deployed a production-ready QR code generator using **Java, Spring Boot, Thymeleaf, and ZXing** with support for **PNG/SVG** export, logo embedding, and customizable QR styling.
- Implemented a layered architecture with **DTOs, Bean Validation**, global exception handling, and asynchronous request handling to deliver a robust and maintainable application.
- Containerized the application using **Docker** and deployed it on **Render**, providing a responsive UI with dark mode, custom colors, and downloadable QR codes.

Startup Ecosystem Tracker | *Java, Spring Boot, MySQL, JSP, Spring Security*

[GitHub](#) | [Demo](#)

- Developed a full-stack startup networking platform enabling founders and investors to connect using **Java, Spring Boot, MySQL, JSP, and Spring Security**.
- Implemented **role-based authentication and authorization**, designed relational database schemas, and built secure **RESTful APIs** for startup, investor, and user management.
- Optimized data retrieval with **pagination** and validated API functionality using **Postman**, ensuring reliable request handling, consistent responses, and scalable performance.

Technical Skills

Programming Languages: Java 8+, SQL

Backend & Frameworks: Spring Boot, Spring Security, REST APIs, JPA/Hibernate

Databases: MySQL, Query Optimization, Indexing

Tools: Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA

Core CS & Concepts: Object-Oriented Programming (OOP), Collections Framework, Multithreading Basics, Authentication & Authorization

Certificates

Java Certification – DataFlair

MySQL – HackerRank

Java Basics – HackerRank

Computer Networking – Simplilearn

Achievements

Solved 300+ Data Structures & Algorithms problems on LeetCode using Java.

Presented a Review paper at GSIR 2025 on AI-based startup–investor matchmaking.
